# SAVING ENERGY AT LEISURE

## WHY SAVE ENERGY?

Saving energy makes sense; it **saves money** and helps everyone in the fight against **climate change**.

The most effective way to save energy is to **use energy more efficiently**.

Energy is a leisure centre's **second largest expense**.

Lower energy costs save money for **staff, facilities** and the **community**.

## OUR GUARANTEE?

Our energy efficiency solutions will **cut energy use** in your leisure centre **by 15% to 30%**.

We **GUARANTEE** it.

Get a no-obligation outline of the guaranteed savings your site can achieve. Simply complete a 2 page online survey at **[carbonetix.com.au/leisure](http://carbonetix.com.au/leisure)**

After completing the survey, we will contact you to discuss a **FREE on site energy assessment**.

# SAVING ENERGY AT LEISURE

*Victorian leisure centres have a unique opportunity to make significant energy, greenhouse gas and cost savings through energy-efficiency.*

*With a savings guarantee, the returns are fixed - making budget and funding approval straight forward*

## WHY CARBONETIX?

Our engineers have found significant energy saving opportunities in **over fifty** sports, aquatic and **leisure centres**.

We conduct hundreds of **site assessments each year** and have helped thousands of commercial and government facilities reduce emissions and **save energy**.

## 5 STEPS TO GUARANTEED ENERGY SAVINGS

- 1 Complete our two page online survey about each centres facilities
- 2 We provide a preliminary indication of the level of savings available to each site, including the level of savings that we would guarantee.
- 3 After reviewing this offer, you decide if you want a Carbonetix energy efficiency engineer to complete a FREE on site energy assessment. We expect this to be a strong indication of your willingness to undertake an energy efficiency project.
- 4 You will receive a formal quote with the level of guaranteed energy savings e.g. *"Our savings measures will save \$30,000 a year guaranteed. The cost of implementing these measures is \$150,000. This provides a payback period of 5 years."*
- 5 CarbonetiX will project manage the implementation energy efficiency works, leaving you free to focus on running your leisure centre.

# SAVING ENERGY AT LEISURE

*"Since the implementation of many key energy efficiency measures, Reservoir Leisure Centre was able to add a high-temperature hydrotherapy pool to its facility without any increases to its yearly energy costs."*

Facilities such as **Reservoir Leisure Centre** are already realising that energy efficiency measures can make a real difference.

Similarly, after consulting with CarbonetiX in 2008 **Ringwood Leisure Centre** introduced pool-blankets. This low cost measure resulted in an 8% reduction in gas costs. It also reduced evaporation which shrunk water and pool chemical costs.

For more case studies or to get an outline of the energy savings your leisure centre can make, contact CarbonetiX or complete the following two page survey:
